

## How to fill your Cartomisers with e Liquids

Soulblu | Electronic Cigarettes | Melbourne – Victoria | Ph. 9005-6067 | [www.soulblu.com](http://www.soulblu.com)

This is how your cartomisers look when you take them out of the packet

Remove the plastic end caps from each end.

Use a needle or nail to pull the cap off the butt end.

This is what it will look like. You will see wadding inside.

Drip about 20-30 drops of E-liquid onto the wadding. Do not overfill. When wadding is saturated then it is full.

This is what it should look like.

Replace the end cap.

### **WARNING:**

- Overfilling your cartomiser will damage your battery and void your warranty.
- Gently blow on the threaded end to expel any liquid.
- Wipe down your atomiser completely before installing it on your battery.
